

## **Project & Construction Management for Ethanol, Distillery, Oil and Gas Industry**

- ✓ SS and CS Piping fabrication & Erection
- ✓ CS Cross country Piping
- ✓ SS and CS Site fabricated Tanks
- ✓ Structural Fabrication and Erection
- ✓ Critical Equipment & Skid
- ✓ Shop facilities for Prefabricated Piping & static equipment
- ✓ Electro mechanical turn key projects

## ❖ About us

Enprosyst Solution Pvt. Ltd. covers the entire lifecycle of creating your project infrastructure. Whether it's processing units in the base Ethanol, Distillery, Oil and Gas Industry in view of Engineering, Procurement, Construction, Manufacturing, Commissioning of Distillery/Ethanol, Oil & Gas, Dairy, Beverage, FMCG, Pharmaceutical and Power Industry. We are an ISO 9001:2015 Certified company established in 2013. We having 15,000 sq. ft. Manufacturing unit with advance facilities & in-house manufacturing under conditional team crew. Perfect design, procurement and manufacturing as well as construction. We also take care of the subsequent maintenance of your assets.

Our concept of total project ownership ranges from technical advisory services to mechanical completion and commissioning, including specific technologies required for key pieces in your project.

Building on a strong reputation for excellent service Enprosyst is keen to take on assignments for a wide range of project sizes, supported by in-house piping and skid fabrication facilities and a comprehensive network of service delivery points. Our high-end process control systems ensure the safe and reliable operation of your plants.

## Our Services

As a one-stop-shop, Enprosyst Solution Pvt. Ltd. offers services that cover planning, engineering, procurement, manufacturing and construction as well as commissioning and maintenance of new and existing plants. We build proprietary equipment in our own fabrication workshops, ensuring the highest levels of quality and minimizing your risks with regard to schedule, cost and labour.

## Processing Units

Enprosyst Solution Pvt. Ltd. is the perfect partner for developing and executing projects such as gas processing plants and upgrade services for processing units. Our technology portfolio includes competences and know-how in various processes, covering Project & Construction Management for Ethanol, Distillery, Oil and Gas Industry SS and CS Piping fabrication & Erection CS Cross country Piping, SS and CS Site fabricated Tanks, Structural Fabrication and Erection, Critical Equipment & Skid, Shop facilities for Prefabricated Piping and static equipment, Electro mechanical turn key projects.

## ❖ Project Lifecycle

We offer integrated solutions for project execution covering the entire life cycle from engineering and technology to manufacturing, construction and maintenance.

### PROJECT CONSULTANCY :

In the concept phase of your project, our feasibility studies and concept selections are critical factors when it comes to project scoping and investment decisions – for both green- and brownfield projects.

### ENGINEERING :

Our offering covers all engineering disciplines, such as process design and P&ID development, detailed engineering and 3D CAD model completion, equipment sizing as well as inquiry specifications. We have expert engineering teams to offer tailor-made solutions for our customers.

### PROCUREMENT / FABRICATION :

Enprosyst runs its own workshops. We fabricate piping, steel structures and modular skids. We also provide the required fabrication planning, quality control and inspection services. While procuring both on behalf of clients and for our own fabrication needs has resulted in us acquiring extensive knowledge of the equipment manufacturers' networks and expertise in negotiating cost-efficient supplies.

### CONSTRUCTION / COMMISSIONING / STARTUP :

We also provide commissioning and start-up teams that work closely together with the operation team of the customer. If required, they are complemented with our maintenance staff and process experts from our engineering units.

### MAINTENANCE / TURNAROUND :

We understand maintenance as an integral part of the value chain and have several thousand engineers, technicians and skilled workers in this area. For the customer, this means comprehensive expertise combined with a high degree of flexibility.

### MODIFICATION / OPTIMIZATION / EXTENSION :

Leveraging our extensive engineering and maintenance experience and capabilities enables us to create more value for customers by modifying, optimizing and extending processing plant units. This includes 3D scans as well as their conversion into CAD models to evaluate and confirm the as-built plant documentation. This in turn is the basis for subsequent engineering and procurement services for plant modification.

## Mission

We will create long term value for our customers by understanding their goals and delivering comprehensive, innovative solutions that exceed their expectation.

## Vision

Our vision is to be the world's premier provider in the markets we serve, continually strengthened by the growth and contributions of our people and our ability to earn repeat business.

## Core Values

## HSE Policy :

Enprosyst solution Pvt Ltd aims to achieve a high standard of health, safety and environmental awareness in connection with the associated works during the execution of projects on continuous basis. The objective of project is to complete the work scope with no harm being caused to individuals or the environment and no damage to equipment and assets. In order to aspire to the required standard, commitment, co-operation and understanding will be required from all levels of personnel, regardless of employer, associated with the works, who are directly or indirectly involved in execution of the project. Enprosyst solution Pvt Ltd strongly believes that all accidents and environmental incidents are preventable. We are aware of aspirations in achieving compliance with high HSE standards and discharge of statutory duties thereby achieving excellence in the delivery of our services and successful completion of the projects.

## QAC Policy :

We are committed to:

- ❖ Enhancing the skill of Management and staff through review and actively pursuing an on-going training policy the objective of which is to prepare staff to perform their work more effectively.
- ❖ Providing customers with high quality installation and services which meet requirements are fit for their purpose.
- ❖ Operating the business to the system required by ISO 9001 2015. Rigorously controlling the supply, Fabrication, Installation, Testing and completion to program of all projects.
- ❖ Promoting the culture of continual quality improvement and the philosophy of getting things "Right first time"

### ❖ Shop Facilities & Fabrications / Infrastructure

#### Shop Overview Photo :

#### Piping Prefabrication :

#### Pressure Vessels :

#### Hygiene & Food Processing Tank :

❖ 2G Ethanol Project at IOCL

❖ ONGC Site

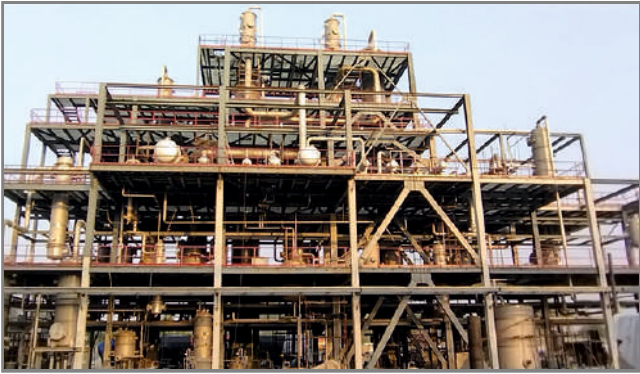

❖ Khopoli-50 MT SS Tankages

❖ Cross Country Piping with HDPE Insulation

❖ 2G Ethanol – Distillation Section Piping

❖ Structural & Skid Works :
